GEC JOURNAL OF SCIENCE & TECHNOLOGY

INDEX TO VOLUME 47, 1981

THE GENERAL ELECTRIC COMPANY LIMITED

INDEX

VOLUME 47, 1981

Inclusive page numbers for the year's issues are:

No. 1 ..... 1 to 52
No. 2 ..... 53 to 104
No. 3 ..... 105 to 148

PAGE

A

Application of laser anemometry to the measurement of airflow through a cascade of turbine blades 69
Automatic control of unattended traction substations 102

B

Blade cascades with shock and boundary-layer interaction – Calculation of transonic flows in 107

C

Chemical plant – Improved enamels for 87
CMOS silicon-on-sapphire – A high-performance LSI technology: 55
Colour TV camera performance: the Marconi Mark IX cameras 17
Compensators using saturated and thyristor-controlled reactors – Operating characteristics of static 142
Computation of transonic flows in blade cascades with shock and boundary-layer interaction 107
Computer applications in medicine 77
Computer-prediction method – Heating effects caused by unbalanced faults in turbine-generator rotors: a 62
Computer simulation of the JET generator-converter set 25
Control of unattended traction substations – Automatic 102

D

Delay distortions in troposcatter propagation 135
Development of off-shore gas turbine packages for power generation and mechanical drive 11
Digital radio-relay systems: a decision-feedback equalizer and carrier-recovery circuit – Spectrally-efficient 115
Drives – Transistor-inverter traction 95

E

Enamels for chemical plant – Improved 87

PAGE

F

Fully static auxiliary power supplies for air-conditioned rail coaches 120

G

Gas-turbine packages for power generation and mechanical drive – Development of offshore 11
GEC contribution to viewdata 3
GEC wins Britain's biggest export order: 2640 MW power station for Hong Kong 86
Generator-converter set – Computer simulation of the JET 25

H

Heating effects caused by unbalanced faults in turbine-generator rotors: a computer-prediction method 62
High-performance LSI technology – A: CMOS silicon-on-sapphire 55

I

Improved enamels for chemical plant 87
In other GEC publications 52, 104, 148

J

JET generator-converter set – Computer simulation of the 25
JET – Support systems for 36

L

Laser anemometry – Application of, to the measurement of airflow through a cascade of turbine blades 69
LSI technology – A high-performance: CMOS silicon-on-sapphire 55

M

Marconi Mark IX cameras – Colour TV camera performance: the 17
Medicine – Computer applications in 77
Monopulse technique applied to current secondary surveillance radar 127

PAGE

O

Off-shore gas-turbine packages for power generation and mechanical drive – Development of 11
Operating characteristics of static compensators using saturated and thyristor-controlled reactors 142

P

Power generation and mechanical drive – Development of off-shore gas-turbine packages for 11
Power station for Hong Kong – GEC wins Britain's biggest export order: 2640 MW 86
Power supplies for air-conditioned rail coaches – Fully static auxiliary 120

R

Radar – Monopulse technique applied to current secondary surveillance 127
Radio-relay systems: a decision-feedback equalizer and carrier-recovery circuit – Spectrally-efficient digital 115
Rail coaches – Fully static auxiliary power supplies for air-conditioned 120

S

Secondary surveillance radar – Monopulse technique applied to current 127
Silicon-on-sapphire – A high-performance LSI technology: CMOS 55

PAGE

Spectrally-efficient digital radio-relay systems: a decision-feedback equalizer and carrier-recovery circuit ... .115
Static auxiliary power supplies for air-conditioned rail coaches – Fully ... .120
Static compensators using saturated and thyristor-controlled reactors – Operating characteristics of 142
Support systems for JET 36
Synopses 2, 54, 106

T

Thyristor-controlled reactors – Operating characteristics of static compensators using saturated and 142
Traction substations – Automatic control of unattended 102
Transistor-inverter traction drives ... .95
Transonic flows in blade cascades with shock and boundary-layer interaction – Calculation of 107
Troposcatter propagation – Delay distortions in 135
Turbine blades – Application of laser anemometry to the measurement of airflow through a cascade of 69
Turbine-generator rotors – Heating effects caused by unbalanced faults in: a computer-prediction method 62
TV camera performance – Colour: the Marconi Mark IX cameras 17

V

Viewdata – GEC contribution to 3
